

## Sending Email Using Nodemailer :

### My code :

```
5
6  const transporter = nodemailer.createTransport({
7    host: "smtp.office365.com",
8    port: 587,
9    secure: false,
10   auth: {
11     user: "administration.sts@avocarbon.com",
12     pass: "XXXXXXXXXXXX",
13   },
14   tls: {
15     rejectUnauthorized: false,
16   },
17 });
18
```

Ça c'est le transporteur le problème c'est avec ce mail **@domaine.com** je n'a pas pu envoyer le mail et le type d'erreur est : malgré que j'ai généré le app password.

### Erreur :

The image shows two screenshots of the AVO Carbon HR Service GROUP web application. The left screenshot displays a leave request form with the following fields: Serial Number (Employee ID, ID Number, MAT) with value 24; Type of Leave with value Business; Start Date of Leave with value 11-12-2024; End Date of Leave with value 12-12-2024; Phone (Personal Number) with value 52424988; and Justification with value test. Below the form is a section for uploading a justification file, showing a file named 'undraw\_Time\_management\_re\_85w (1).png'. The right screenshot shows the same form, but with a success message overlay: 'Success! Leave request submitted successfully!'. The message is accompanied by a green checkmark icon and an 'OK' button.

- Home
- My Leave
- My Mission
- My Authorization
- My Documents

Leave Type	Dates	Justification	Status	Action
Business	from 10/12/2024 to 12/12/2024	test	Rejected	Delete
Business	from 09/12/2024 to 10/12/2024	test 1	Approved	Delete
Business	from 10/12/2024 to 11/12/2024	test	Pending	Delete
Injury	from 10/12/2024 to 11/12/2024	test	Pending	Delete
Business	from 10/12/2024 to 12/12/2024	test	Pending	Delete
Business	from 11/12/2024 to 12/12/2024	test	Pending	Delete
